Weekly Coal Production

Production for Week Ended:
June 10, 1989

Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are usually published twice a month. This week's Supplement contains coal production by state for May 1989, coal supply and demand for 1977-1989 and coal consumption by consumer categories. Also, this publication contains revised data for consumption and stocks at consumers for the first three quarters of 1988. This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as specified in the Federal Energy Ad-

ministration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1987*, and *Coal Data: A Reference*.

This publication was prepared by Wayne M. Watson under the direction of Mary K. Paull and Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202)586-8800.*

Summary

U.S. coal production in the week ended June 10, 1989, as estimated by the Energy Information Administration, totaled 20 million short tons, a 9 percent increase from the previous week, and 12 percent higher than the comparable week in 1988.

May 1989 coal production totaled 83 million short tons, 9 million short tons more than in May 1988.

Total U.S. coal production for the first five months of 1989 (January - May) reached 406 million short tons, nearly 20 million short tons more than in the compa-

table period of 1988. States East of the Mississippi produced 15 million short tons more during this period in 1989 versus 1988. West Virginia, Kentucky and Virginia each contributed about 3 million short tons to this increase.

For the first five months of 1989, U.S. coal production West of the Mississippi was 5 million short tons higher compared to the same period in 1988. Wyoming had the largest gain (3 million short tons) followed by Colorado (2 million short tons), while Montana coal production was 2 million short tons less than in the same period of 1988.

Energy Information Administration Electronic Publication System(EPUB)

User Instructions

Selected energy data reports can be obtained electronically from the Energy Information Administration (EIA) Computer Facility. Public access to these machine readable statistics is possible by dialing (202) 586-8658 for 300 baud or 1200 baud line speeds. Communications are asynchronous and require a standard ASCII-type terminal. There is no charge for the service. Although there is no required password, you will be requested to use your telephone number as a user identifier. This service is available from 8 a.m. to 11 p.m. weekdays and 10 a.m. to 6 p.m. on weekends and most holidays. The Weekly Coal Production report is normally updated by 2 p.m. on Friday of each week. Allow one or two additional workdays in weeks containing holidays.

Access Instructions:

1. DIAL (202) 586-8658

Your Government has published thousands of books to serve America. And now the Government Printing Office has put together a catalog of the Government's "Bestsellers"—almost a thousand books in all. Books like *The Space Shuttle at Work, Starting a Business, U.S. Postage Stamps,* and *National Parks Guide and Map.* I daresay there's even information on one of my favorite subjects—printing.
